

## 2023 RAIL SAFETY BOOT/SHOE PROGRAM

Qualified NJ TRANSIT Rail employees are eligible to receive one (1) \$60.00 subsidy per calendar year towards the purchase of select safety boots or shoes well as one (1) additional \$60.00 subsidy for the selected Winter Boot. This is a voluntary program, safety boots or shoes purchased outside of the company vendor are not eligible for the subsidy.

To make a purchase in person, employees may visit Saf-Gard's branch in Edison or participate in one of SafGard's bi-annual shoe truck visits at various NJ Transit locations and provide their NJ Transit ID at the point of sale.

To order by phone, employees must call the Saf-Gard local branch in Edison, provide a picture of their NJ Transit ID via email to [edison\\_store@safgard.com](mailto:edison_store@safgard.com) and have their shoes or boots delivered to their home address.

- T&E employees including Ticket Agents/TVM Agents, Rail office personnel and Locomotive Engineers will receive (1) \$60 subsidy for any soft-toe shoe or soft-toe/hard-toe boot listed in the program.
- Engineering and Mechanical Department employees will receive one (1) \$60 subsidy for any boot listed in the program.
- All Rail employees are eligible to receive one (1) additional \$60 subsidy for one purchase of one of the selected winter boots.

As a reminder, all Engineering employees working on bridges are required by FRA regulation to wear safety-toe boots when working on bridges.

Employees are responsible for paying any remaining balance after the subsidy is applied. If paying through payroll deduction, the remaining balance will be deducted automatically by Payroll after tax.

**Note: All Rail employees may make multiple purchases at the discounted prices offered exclusively to NJ Transit Rail employees, however employees will not receive additional yearly subsidies beyond the one (1) \$60.00 subsidy for a regular boot or shoe as well as one (1) additional \$60.00 subsidy for a winter boot.**

# SAFETY PROPERTIES

## STEEL SAFETY TOE

As part of this standard, employers require ASTM F2413-18 rated footwear in areas where employees are exposed to injury as a result of falling or rolling objects. All steel toe shoes in this catalog meet or exceed ASTM F2413-18 I/ C.

## COMPOSITE SAFETY TOE

Compared to their steel toe counterparts, the composite toes are manufactured using lightweight materials to make the shoe weigh less while meeting ASTM standards. These shoes meet or exceed ASTM F2413-18 I/ C standards.

## ALLOY SAFETY TOE

A lighter weight safety toe meeting ASTM F2413-18 I/ C standards.

## NANO TOE

Nonmetallic safety toe that is 50% lighter than conventional steel toes, and 40% thinner than conventional composite toes. The Nano toes provide protection meeting ASTM F2413-18 I/ C standards.

## METATARSAL GUARD

Metatarsal guard shoes protect both the toes and the metatarsal bone behind the toes. Metatarsal guard shoes are required in any environment where injuries can occur to the metatarsal bone. They are most commonly used in foundries, welding, air product distribution and other heavy manufacturing. All styles marked with the "MG" icon in this catalog meet the ASTM F2413-18 Mt standards.

## STATIC DISSIPATIVE

SD shoes regulate the build up of an electrical charge in an employee's body. SD shoes are commonly used in manufacturing of computer components, solvent based paints and plastics. SD products reduce the risk of static shock to people and the manufactured product. All safety toe styles marked with the "SD" icon in this catalog meet the ASTM F2413-18 SD standards.

## CONDUCTIVE

Conductive safety shoes protect against the hazards of static electricity build-up. They are intended to protect the wearer in an environment where the accumulation of static electricity on the body is a hazard. These shoes should not be worn by persons working near open electrical circuits. ALL styles marked with the "CD" icon in this catalog meet the ASTM F2413-18 Cd standards.

## ELECTRICAL HAZARD

The soles of EH shoes provide a barrier to protect employees from open electrical currents up to 600 volts. EH shoes are often needed in maintenance, welding and engineering positions. All styles marked with the "EH" icon in this catalog meet the ASTM F2413-18 EH standards.

## INSULATION

Several of our styles provide insulation against the cold and are built for the tough outdoor environments. Our range of insulation available is 200gms- 800gms. The styles offering insulation will be marked with the specific weight of insulation to help guide you in your selection.

## HIGH HEAT

These shoes feature outsoles that resist a minimum high heat temperature of 572, 752 or 932 degrees Fahrenheit depending on the icon used with the shoe listing.

## WATERPROOF

Waterproof boots and shoes are constructed to keep the feet dry and comfortable in wet conditions. Waterproof construction requires continuous maintenance and is not guaranteed to remain for the life of the shoe.

## PUNCTURE RESISTANT

These shoes are designed to reduce the impact of sharp objects which are damaging to the foot. Puncture wounds can be hazardous to the midsole of the foot and the appropriate footwear is necessary on job sites where sharp objects can pierce the sole. These shoes meet the ASTM F2413-18 PR standards.

## FLEXIBLE

These shoes provide more movement, flexibility and superior overall comfort.

## SLIP RESISTANT

Slip-resistant safety footwear is the fastest growing segment of the safety footwear industry. For many employers with wet, oily, and/or greasy floors, it is common sense to require slip-resistant safety footwear. Slip related injuries can be extremely costly. No shoe is slip proof, however employers who require slip-resistant shoes can reduce worker's compensation claims.

## SECURITY FRIENDLY

Security friendly styles are made from all nonmetallic components including styles with safety toe caps. Security friendly styles have non-metallic eyelets, hardware and shanks for the most sensitive security systems.

## COMFORT

Saf-Gard carries several brands with unconditional 30-day comfort guarantees. These products give you 30 days to test for comfort. If you are not completely satisfied we will exchange it or process a refund.

## LIGHTWEIGHT

These styles are much lighter weight than traditional safety shoes.

## BLOODBORNE PATHOGEN RESISTANT

Breathable membrane helps protect from diseases caused by blood-borne pathogens. Meets ASTM F1671-07 safety standard.

## SIDE ZIPPER

Boots showing this logo feature a side zipper for easy on/off.

## USA MADE/ASSEMBLED

Saf-Gard is proud to offer several styles of safety shoes that are either made or assembled in the USA.

## GORE-TEX®

This waterproof breathable material allows air circulation, but does not let water in. It is guaranteed 100% waterproof.

## VIBRAM

High performance outsoles for rugged, outdoor and service footwear.

## PORON XRD® EXTREME IMPACT PROTECTION

Metatarsal guard technology for men and women that combines comfort, flexibility and outstanding performance. Absorbs and instantly dissipates 90% of energy when impacted.

## UNION

These styles are produced by the United Food & Commercial Workers International Union in USA Plants.

## XTR® EXTRA-WIDE TOE CAP

Boots showing this logo feature the XTR® extra toe room, extra comfort, extra-wide composite toe or alloy toe safety toe cap.

## MaxTRAX® OUTSOLE TECHNOLOGY

Industry leading slip resistance with SR Max MaxTRAX® outsole technology featured on select styles from SR Max®, Reebok®, SKECHERS Work®, Timberland PRO®, Rockport Works® and Florsheim Work®.

## INDOOR COLD STORAGE OUTSOLE

Patented MaxTRAX® outsole technology featuring a rubber compound developed for use in indoor cold storage environments and walk-in freezers.

WARNING: This product is only part of an overall safety program. No shoe can protect you from injury in all situations. All safety shoes are used in environments where hazards exist beyond the scope of protection a safety shoe can offer. Slip-resistant SHOES ARE NOT "Slip Proof". Environmental factors including but not limited to oils, water, dust, flour, ice, objects on the floor, or other hazards can reduce the effectiveness of slip-resistant footwear. Also, cold environments including freezers and coolers will significantly limit the effectiveness of slip-resistant footwear. It is possible for you to slip, fall, and/or be injured while wearing/using personal protective equipment including slip-resistant shoes or ASTM rated safety shoes. You should always take precaution and consider the environmental hazards around you when wearing your protective footwear. All products are sold subject only to the warranties given by the manufacturer. If the product is marked as meeting an ANSI or ASTM standard, then the product carries a manufacturer's warranty. Saf-Gard Safety Shoe Company provides no express warranty and expressly disclaims all implied warranties including any implied warranty of merchantability or fitness for any particular purpose. PLEASE NOTE: Great care should always be taken to review the environment you walk in. Freezers and icy surfaces remain among the most dangerous to walk on. SR Max cold storage outsoles offer improved slip resistance, but no shoe is slip proof...especially on ice and in freezers.
